

# m2mAIR Cloud

The do-it-yourself m2mAIR Cloud service **simplifies the creation** of your own end-to-end applications for m2m and the Internet-of-Things

**The m2mAir Cloud Platform-as-a-Service, powered by deviceWISE, reduces risk, time-to-market, complexity and cost versus building your own point-solution.** m2mAIR Cloud features comprehensive management and configuration capabilities for all your devices and data transfers – from basic solutions to global, enterprise-grade deployments.

Plus, its easy-to-use portal lets you visualize data in easy-to-read dashboards right out of the box. m2mAIR Cloud meets or exceeds even the most stringent enterprise requirements for mission-critical reliability, security, scalability and performance.

## GETTING STARTED IS **EASY**

Connecting your “things” to the cloud is simple with Cloud-ready Telit Wireless Modules, m2mAIR Mobile connectivity and m2mAIR Cloud service.

**Telit Cloud-ready modules**  
Embedded APIs and simple AT commands instantly transfer data between devices and the Cloud

**m2mAIR Mobile**  
Provision, connect and manage your network subscriptions

**m2mAIR Cloud**  
Connect, collect, and control virtually anything with bi-directional data transfer

## DO-IT-YOURSELF

m2mAIR Cloud provides everything you need to build your own m2m/IoT solutions - from concept to commercial:

### RESOURCES INCLUDE:

- Extensive developer resources and support
- Self-registration and configuration
- Intuitive management portal
- Click-to-Cloud configuration
- Evaluation Kit for advanced rapid-development
- Unlimited access to the deviceWISE community

# UNLIMITED SCALABILITY WITH

# ENTERPRISE-GRADE PERFORMANCE

m2mAIR Cloud supports flexible end-to-end deployments with disparate devices, technologies, networks and business systems across different industries and geographies. It offers unlimited scalability and enterprise-grade performance through a comprehensive set of functions broadly considered the industry benchmark for m2m/IoT:

## THING INTEGRATION

Whatever you need to connect – new or old – a variety of software agents and APIs with built-in drivers and edge intelligence, including: Telit Cloud-ready Telit modules, Gateway Agent software, and Open APIs

## END-TO-END SECURITY

Configurable security settings for authentication and registration, role-based permissions, encryption, and audit and reporting

## DEVICE MANAGEMENT

Complete remote updates and configuration management – for a single device or for them all

## CLOUD SERVICES

Comprehensive management portal, scalable data storage and flexible hosting options

## NETWORK INTEGRATION

CDP integration, provisioning and billing across any wireless network

## ENTERPRISE & APP INTEGRATION

Built-in Enterprise Gateway technology for integration with enterprise systems from IBM, SAP, ORACLE, Microsoft and more. Also featuring API's for Web and mobile app

# THRIVING ECOSYSTEM

m2mAIR Cloud customers can also leverage our ever-expanding network of recognized m2m/IoT technology and product developers, system integrators and telecom carriers, as needed.

- DeviceWISE-Ready hardware and software
- Professional services and integration support
- Wireless network services
- Custom point solutions and applications
- End-to-end commercial deployments
